- iOS: Swift, SwiftUI, UIKit, Objective-C, Xcode
- Concurrency: async/await, MainActor, (Actors)
- Reactive: Combine / OpenCombine
- Architecture: MVVM, VIPER, Design Patterns, DI
- Testing: Unit Testing (XCTest/Swift Testing), (UI Testing/XCUITest)
- Tooling: Git, Git-flow, CI/CD (GitHub Actions), SwiftLint, SonarQube, Instruments
- Collaboration: Scrum, teamwork, effective communication

LANGUAGES

- English (Intermediate)
- Spanish (Fluent)

PROFILE

Senior iOS Developer (5+ years) building native iOS apps with Swift, SwiftUI, and UIKit in product and enterprise environments. Strong focus on scalable architecture and code quality (MVVM/VIPER, DI, testing, CI/CD), plus stability and performance improvements using profiling and continuous refactoring. Comfortable owning features end-to-end and collaborating with backend/QA/product teams in Agile/Scrum.

WORK EXPERIENCE

ALTEN   September 2025 - Present
Senior iOS Developer

Senior iOS Developer at Inditex, building One Store, an internal iOS app for retail operations (baskets, promotions, sales, stock, item onboarding, events).

Plexus Tech   January 2022 - September 2025
iOS Developer

Working on the native iOS application for the most important bank in Spain. Using VIPER architecture, Unit testing and Swift 5.0.

Dual Link   February 2021 - January 2022
iOS Developer

As iOS developer I am involved in the process of developing applications for iPhone and iPad, using Swift and Objective-C programming languages within the Xcode programming environment.

Embention   June 2019 - July 2019
Software Engineer Internship

My role within Embention was to support the software department. I have been working on the Joint Strike Fighter Air Vehicle C++ standard (JSF AV C++). I learned about the standard and its rules, in order to correct code.
